

Trees

To start with, Arnold is nice and beautiful. Sometimes the buildings are cool to look at and it is a good place to visit. It's a nice place to hang out during the summer. But there is one thing that would make Arnold nicer. The trees are beautiful and nice to see, but we need new trees. We don't need trees at the city park or near any house or any place near buildings. There is one exact place in town where we do need to plant saplings. We need new fresh trees at the State Park here in town.

Next, people are noticing that more trees at the State Park are starting to die. Lots of branches are starting to come off and they look really pale. I think that we should plant fresh and new trees at the state park to keep good smelling, fresh air. The lake in the summer gets really smelly and I think that new trees would really help with some of that smell. We don't need to plant seeds or anything like that. I believe that we need to plant saplings, to make it easier.

Finally it would be way nicer to have new and improved trees to make the state park look way better. I believe that it is beneficial to all of us because the trees at the State Park are clearly starting to look like they are dying. In my opinion I believe that we should add more new trees to the state park, and I think that most of us could agree that we do need new trees.
