Dog Park

I think Arnold should put a dog park out at the state park. There would be a place to take your dogs and walk your dogs instead of walking them around town with cars they might want to chase, or people they want to chase. When some dogs see cars, people, or other dogs the owners sometimes can't control the dogs. Some are too big to control. If the dogs chase the cars the dogs might get run over and would make the owner and the driver sad and who would want to run over a dog. There are some people who do not like the dogs in town and get angry at people walking their dogs because they're either too loud and bark all the time or that they are scared the dogs might attack them because they look mean.

This dog park would be good for the state park. It would create friendships. You can make friends at the dog park because someone that doesn't live here could be camping out there and want to take their dogs to the dog park and someone that does live here could take their dogs out there. While your dog plays you can talk to people and become friends with them.

This dog park will definitely be beneficial to everyone here in Arnold and the campers that camp here. This park will benefit everyone because if some people want to go fishing out at the lake but don't want to leave their dogs home but also don't want their dog to jump in the lake and get all wet and smelly they could leave their dogs at

Student #15

the dog park for a little while. If campers want their dog to go outside while they go to town for a little while and don't want their dogs to stay inside they can leave them at the dog park.

This dog park is fair to everybody because people will still be able to walk around the park, fish, camp, play at the playground, and drive around out there. Everybody can still do what they want out there but there will just be a little dog park where dogs can play. This is also fair to the dogs because now they won't have to be at risk of getting run over or of getting pet by kids everywhere they go. They won't have to be chained up to a leash either.

This is what I want to be put into Arnold and it probably won't cost that much money and it won't take that long either. We just have to get a few people to help and we might get it built in a month or two. You could also give someone a job by having them pick up after the dogs; it could be a kid or an adult.
